Seal off corrosion with a coating made for any environment.
Corrosion control is a given challenge for many industries with systems exposed to extreme weather and moisture. With Rust Grip®, you can stop the progression of rust and corrosion like never before. Within one hour of application, Rust Grip® begins to cure by pulling moisture from the air and microscopically swelling into the individual pores of the surface as it hardens. This process seals against any possibility of outside air, moisture, or minerals attacking the surface and causing further corrosion. Rust Grip® also encapsulates toxic elements such as lead-based paint, asbestos, and other biohazardous materials. The success of Rust Grip® in a variety of environments can be seen everywhere from chemical fields, oil fields, oil rigs and numerous hazardous areas. This widespread use is just one more way that SPI remains an obvious and trusted choice to solve real world problems and conditions.
RUST GRIP®

Rust Grip® is easy to apply and stops the progression of rust and corrosion while protecting the surface far longer than conventional surface plating and industrial-grade rust inhibitors. Traditional methods of corrosion protection have remained unchanged for the past 50 years. These methods require sandblasting, primer preparation and multiple application coats. Rust Grip® only requires minimal preparation and no white sand blasting of the surface. After one application, it can penetrate deep into and seal the surface, blocking corrosion quickly and effectively.

RUST GRIP® VS. TRADITIONAL METHODS.

Traditional Methods

- Installation: Requires lengthy sandblasting
- Application: Requires multiple coats
- Moisture Prevention: Limited protection from mold and mildew
- Lifespan: Limited life expectancy
- Corrosion: Side effects include rust and mold growth
- Repair and Maintenance: Requires continual repair or complete replacement

RUST GRIP®

- Installation: Minimal surface preparation
- Application: Paint directly on rust and firmly bonded paint
- Moisture Prevention: Stops water vapor transmission through electro-chemical freezing
- Lifespan: Penetrates deep into pores of surfaces
- Corrosion: Adds strength to weakened surfaces
- Repair and Maintenance: Reduced surface preparation and efficient application yields cost savings

spicoatings.com
Rust Grip® is used all over the world to help industries in need of innovative corrosion control solutions. Its ability to be applied to metal, concrete and even wood makes it effective for quick application and labor savings. See how the industries represented here have made simple improvements with Rust Grip® that continue to make all the difference.
AMERICAN SOCIETY FOR TESTING AND MATERIALS
Salt Fog Spray Test
- Passed 15,000 hours
- 500 hour scribe test
- Perfect score of 10 or only 150 microns DFT
- No bubbles or undercutting along the scribe

NIGERIA OFFSHORE APPLICATIONS
- Years of exposure to submersion, salt spray, sun, abrasion and extreme temperatures caused excessive deterioration of original coating.
- Two coats of Rust Grip® were applied in addition to Moist Metal Grip and Enamo Grip.
- Piping used for offshore drilling operations was completely restored.

US ARMY CORPS OF ENGINEERS
- Most consistent performer.
- Exceeded adhesion requirements.
- Outperformed all other coatings.
- Only ‘3 in 1’ coating solution to pass rust evaluation requirement.

LOUISIANA DEPARTMENT OF TRANSPORTATION
- Lay on the Mississippi 130 St. Vincent Bridge/ passenger car bridge was coated with Rust Grip® without any prep in 2003 and inspected in 2010 by NACE. 20 engineering group finding no corrosion and no lifted through, and rechecked in 2013 confirming no corrosion development. From this performance, the QPL (Qualified Product Listing) for Rust Grip® was issued.“

INDUSTRY COMPLIANT AND TRUSTED
- USDA
- LEED® Compliant
- DNV (Det Norske Veritas)
- Louisiana Department of Transportation
- IMO (International Marine Organization)
- ABS (American Bureau of Shipping)
- U.S. Coast Guard
- Tennessee Department of Transportation
- University of Kentucky
- VIM Approved

Top Companies using Rust Grip®
- Halliburton
- Eni S.p.A.
- Eni Spa Oil
- Saipem S.p.A.
- Chevron Corp.
- Saudi Aramco Oil
- Gazprom Oil
- Shell Global
- ExxonMobil
- Rowan Companies, Inc.
- Drydock World
- Esso
- Mubarak Marine

PROVEN PROTECTION EFFICIENCY.
Rust Grip® creates an unsurpassed protective surface that’s been proven through on-site evaluations and real-world applications.

Superior Products International II, Inc.
PROTECTING INDUSTRIES WITH PREMIUM COATINGS.

Industries cannot rely on temporary efficiency when delivering their products and systems. That’s why SPI Coatings work for numerous corporations and individuals. Our coatings were made to save you money because of their innovative performance and long-term durability. With an international presence in a wide diversity of markets, SPI brings industries peace of mind when it comes to combating weather and corrosion. As energy costs become more complex, SPI Coatings continue to push the boundaries of effectiveness and efficiency. SPI offers a system of products refined from remarkably conclusive data and forged under the most rigorous conditions.
