

Superior External Coating for Completion Tubulars

Rust Grip®

Since 2015, Workstrings has coated over 4,500,000 feet with zero tube corrosion downgrades

Rust Grip® is the leading external coating solution for minimizing pipe corrosion in completion and water-based environments and is exclusively offered by Workstrings International.

Rust Grip® Coating provides a protective film of superior adhesion and flexibility, and is resistant to abrasion, impact, chemical solvents, and acid splash.

Rust Grip® vs. Uncoated

An application of Rust Grip® coating improves corrosion mitigation efforts when applied to completion, intervention, and drilling tubulars in water-based or corrosive environments.
